How to make a Cool Cardz:

Remove plastic wrapping from ink pad and place in stamp holder.

Designing your Cards

1. Choose a card.
2. Write your message with your marker pen.
3. Decorate with stamps and stickers. Using your gel pen, add twirls, circles, hearts and more!

Now Laminate

4. Open a laminating sheet but don't try to remove the purple card!
5. Slide the handle a little to the left or right, depending on whether you are left or right-handed. Then slide the purple card above the visible roller and underneath the handle. Don't push the purple card all the way through - stop once it lifts slightly away from the laminate.
6. Place your finished card on the laminate. Making sure it is straight, push it up against the laminate's crease.
7. Holding down your Cool Card at one end, slide the handle to the middle. Then hold down the front of the Cool Card (under the purple card against the ridge) before sliding the handle as far as it will go. The purple card will be released and can be disposed of. With your fingers, smooth out any bubbles on your laminated card.
8. Fold the card as shown to create a cool envelope to store your cards.
9. Tidy everything away into your Design Unit for creativity on the go!
